Closing cash	**105,687.02**	**150,172.39**	**215,351.81**

Supplier payments differ from cost of sales because stock and supplier terms affect timing. Positive financing cash is funding, not customer revenue or profit.

FINANCIAL REPORT / 06

Break-even & project payback

USD | Operating profitability and investment recovery are separate measures.

Annual measure	Year 1	Year 2	Year 3
Break-even revenue	479,040.70	493,411.85	508,214.57

Assumptions & review

The operating assumptions, accounting policies and items requiring review.

11 financial checks passed | 0 need attention | 6 forecast warnings

- Planning model, not audited accounts or tax advice. Revenue is invoiced as earned; monthly subscriptions only. Annual prepayments, refundable deposits, milestone invoices, unbilled contract assets, customer taxes, seller settlements, capitalized interest and tax-loss carryforwards are not modeled.
- Collection and supplier terms use 30-day monthly interpolation. Inventory purchases and non-stock direct costs use supplier terms; operating costs, setup costs, taxes and opening stock are paid immediately. Stock coverage applies only to linked goods costs. Production stock is tracked separately at unit cost.
- Fictional editorial scenario. Prices, workload, wages, costs and financing are illustrative planning inputs, not current quotes, measured local averages or actual company results.
- Source initial three-person design-hour practice retained for 36 months, with paid principal already in delivery and quarter-time operations fixed. Original five shares/hourly fees remain. Three-month ramp and 6% requested growth replace later design-team expansion. Outside technical consultants, rendering and survey are 10% purchased services, not extra employees or inventory. No construction value or project deposits as revenue. Setup paid once; deposit excluded. Fees grow 2%, salary/fixed costs 3%; 21% tax and 15% employee allowance simplified.
- A 15% illustrative employer allowance is added to paid salaries. The flat 21% native tax provision is a simplified planning input, not an entity or personal tax opinion. Customer sales-tax receipts/remittances and owner distributions are outside this scenario.
- All equity is proposed, uncommitted month-0 cash. No debt is modeled. Opening cash is a reserve, not an extra startup expense. Asset/setup/insurance/premises allowances need scoped quotes; refundable premises deposits and site-specific additional works are excluded.
