FINANCIAL REPORT / 03

Cash flow

Closing cash	**60,405.01**	**79,228.16**	**97,272.65**

Supplier payments differ from cost of sales because stock and supplier terms affect timing. Positive financing cash is funding, not customer revenue or profit.

FINANCIAL REPORT / 06

Break-even & project payback

USD | Operating profitability and investment recovery are separate measures.

Annual measure	Year 1	Year 2	Year 3
Break-even revenue	148,970.15	153,439.24	158,043.00

Cumulative project cash at forecast end	-484,793.70

Assumptions & review

The operating assumptions, accounting policies and items requiring review.

11 financial checks passed | 0 need attention | 9 forecast warnings

- Planning model, not audited accounts or tax advice. Revenue follows the selected sales or service activity. Any modeled subscriptions use monthly billing. Annual prepayments, milestone invoices, unbilled contract assets, customer taxes, seller settlements, capitalized interest and tax-loss carryforwards are not modeled. Refundable launch deposits are included at cost; refund timing, impairment and formal classification are outside scope.
- Collection and supplier terms use 30-day monthly interpolation. Inventory purchases and non-stock direct costs use supplier terms; operating costs, setup costs, taxes and opening stock are paid immediately. Stock coverage applies only to linked goods costs. Production stock is tracked separately at unit cost.
- Entity-level income tax is set to zero. No jurisdictional tax rules or owner personal taxes have been inferred.
- Fictional editorial scenario. Prices, workload, base pay, expenses and owner funding are illustrative inputs. They are not current quotes, market averages, verified demand or actual company results. Employer taxes, benefits and income taxes are excluded; resulting net income is before omitted taxes.
- Source initial scale, mix, base prices and paid roles are retained for Jan2027-Dec2029; later expansion is omitted. Volume is flat, prices grow2% and base/fixed costs3%. Income taxes and employer burden are excluded, not exempt. Named material COGS use physical stock days once; payable days retain the source effective mixed-cost input. Refundable deposits are paid once as nondepreciating asset-ledger proxies; refund timing is not modeled. Native depreciation is added. Full scope/timing changes are explained in the operating prose.
- Role-specific employer-cost allowances follow the saved paid-role rows; zero excludes employer burden rather than proving no obligation. The 0% income-tax provision is an explicit scenario input. A zero input excludes entity income taxes from these results and establishes no exemption; personal taxes, customer sales-tax receipts/remittances and distributions are outside the scenario.
- All equity is proposed, uncommitted month-0 cash. No debt is modeled. Opening cash is a reserve, not an extra startup expense. Asset/setup/insurance/premises allowances need scoped quotes; the listed refundable deposits are included, while unquoted additional site works are excluded.
- Inventory days are physical material coverage applied once to each named COGS row’s inventory share. Payment days are the effective blended delay across all direct-cost purchases and services, not a physical material supplier term. The shared payment schedule is a simplified timing proxy; material-specific supplier schedules are not modeled.

Assumptions & review

Saved warnings continued; no inputs or results have been changed.

- Refundable deposits are paid once before opening and retained at cost without depreciation in the planning asset ledger. Assets and deposits are aggregated as a planning proxy; their formal accounting classification, impairment, refund timing and recovery are not modeled. Deposit cash is not available operating cash.
