Opening cash	51,000.00	51,591.20	67,823.16

Supplier payments differ from cost of sales because stock and supplier terms affect timing. Positive financing cash is funding, not customer revenue or profit.

FINANCIAL REPORT / 06

Break-even & project payback

USD | Operating profitability and investment recovery are separate measures.

Break-even revenue	165,254.30	170,211.74	175,319.02
Margin of safety	-1,468.70	30,261.94	49,612.34

Cumulative project cash at forecast end	-11,552.83

Operating break-even excludes depreciation, interest and income tax. Project payback uses pre-tax project cash before financing and is not a dividend or an investor payout.

Assumptions & review

The operating assumptions, accounting policies and items requiring review.

11 financial checks passed | 0 need attention | 6 forecast warnings

- Planning model, not audited accounts or tax advice. Revenue is invoiced as earned; monthly subscriptions only. Annual prepayments, refundable deposits, milestone invoices, unbilled contract assets, customer taxes, seller settlements, capitalized interest and tax-loss carryforwards are not modeled.
- Collection and supplier terms use 30-day monthly interpolation. Inventory purchases and non-stock direct costs use supplier terms; operating costs, setup costs, taxes and opening stock are paid immediately. Stock coverage applies only to linked goods costs. Production stock is tracked separately at unit cost.
- Fictional editorial scenario. Prices, workload, wages, costs and financing are illustrative planning inputs, not current quotes, measured local averages or actual company results.
- One van and one productive owner-mechanic serve five service packages throughout the three-year forecast. Package prices, task times and mix are illustrative; each package fee includes parts and labor. Its hourly revenue equivalent is the package price divided by its task hours, so the same labor is not charged twice. Sales ramp over three months, with employer costs included in payroll. Parts stock is tracked separately. Expansion to a second van is excluded.
- A 15% illustrative employer allowance is added to paid salaries. The flat 21% native tax provision is a simplified planning input, not an entity or personal tax opinion. Customer sales-tax receipts/remittances and owner distributions are outside this scenario.
- All equity is proposed, uncommitted month-0 cash. No debt is modeled. Opening cash is a reserve, not an extra startup expense. Asset/setup/insurance/premises allowances need scoped quotes; refundable premises deposits and site-specific additional works are excluded.
